Micro music system

DualDock
Bluetooth®

DTM3280

Sound system that fits your home

Obsessed with sound

The Philips micro music system's DualDock charges and plays any Apple Lightning or 30-pin connector device. Multi-device Bluetooth® streaming, MP3 playback through USB Direct and audio-in for other systems are all supported.

Enrich your sound experience

- Bass Reflex Speaker System delivers a powerful, deeper bass
- Digital Sound Control
- 40W RMS maximum output power

Enjoy your music from multiple sources

- Stream music over Bluetooth® with multi-device pairing
- DualDock to charge & play Apple devices (Lightning & 30-pin)
- Play MP3-CD, CD and CD-R/RW
- USB Direct for easy MP3 music playback
- Audio-in for portable music playback
- Digital tuning with preset stations for extra convenience

Design that blends into your interior

- Wall-mountable option for flexible placement
- Compact design fits any space, any lifestyle

PHILIPS

Highlights

Multi-device pairing

Wireless Bluetooth® sound transmission is increasingly common in the world of sound systems, but most Bluetooth® compatible systems allow just one device to connect at a time. Multi-device pairing lets you pair up to three devices and switch between them instantly.

DualDock to charge & play

The innovative Philips DualDock with Lightning and 30-pin connector can charge and play any Apple device. Created to meld sleek styling with effortless functionality, you can switch between either connector in a flash. Enjoy your favorite tunes no matter what Apple device you want to use.

Bass Reflex Speaker System

Bass Reflex Speaker System delivers a deep bass experience from a compact loudspeaker box system. It differs from a conventional loudspeaker box system in the addition of a bass pipe that is acoustically aligned to the woofer to optimize the low frequency roll-off of the system. The result is deeper controlled bass and lower distortion. The system works by resonating the air mass in the bass pipe to vibrate like a conventional woofer. Combined with the response of the woofer, the system extends the overall low frequency sounds to create a whole new dimension of deep bass.

USB Direct for easy MP3 music

Thanks to the complete file transferability, you can easily enjoy the convenience and fun of accessing more digital music via the built-in USB Direct.

Wall-mountable

The perfect combination of a slim and versatile design, your Philips audio system is cleverly designed to blend into your living space. The base of the audio system is a stand so the system can sit securely and nicely on any shelf or cabinet. When wall mounted you have all the same flexibility of the freestanding stand.

Digital tuning with presets

Simply tune into the station that you want to preset, press and hold the preset button to memorize the frequency. With preset radio stations that can be stored, you can quickly access your favorite radio station without having to manually tune the frequencies each time.

Specifications

Sound

- Volume control: up/down
- Maximum output power (RMS): 40W
- Sound Enhancement: Digital Sound Control

Loudspeakers

- No. of built-in speakers: 2
- Speaker drivers: 2.5" woofer
